

**NATIONAL PRIMARY CARE INFECTIOUS DISEASES
SENTINEL SURVEILLANCE FORTNIGHTLY REPORT**

Combining data from The Australian Sentinel Practices Research Network (ASPREN)*
and the Victorian Sentinel Practitioners Influenza Network (VicSPIN)*

No. 07, 2022 - 28th March — 10th April 2022

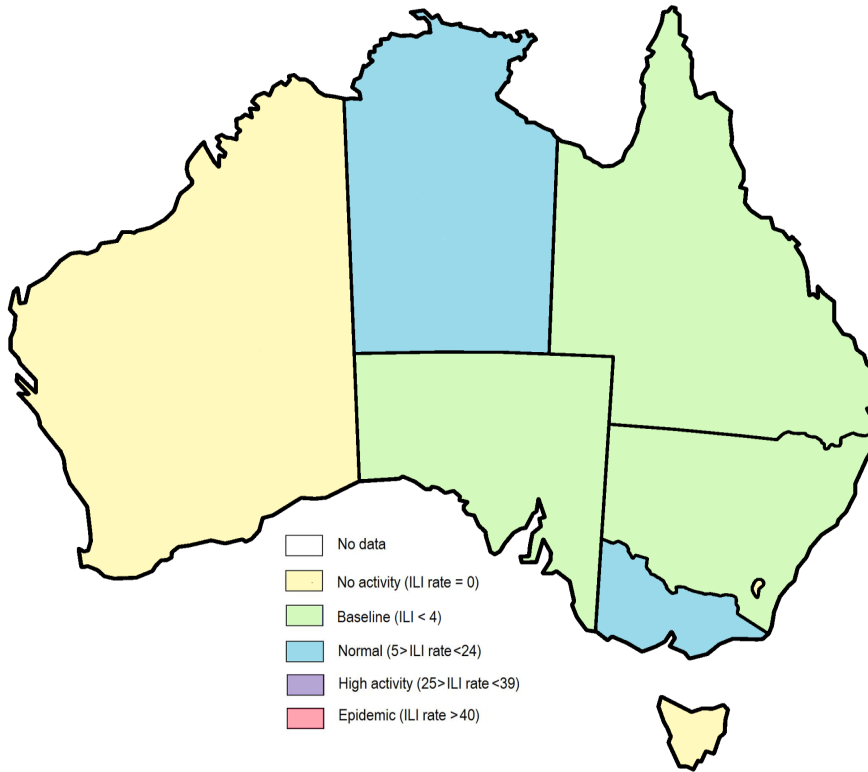

Figure 1. Map of ILI activity by jurisdiction, weeks 13 - 14, 2022.

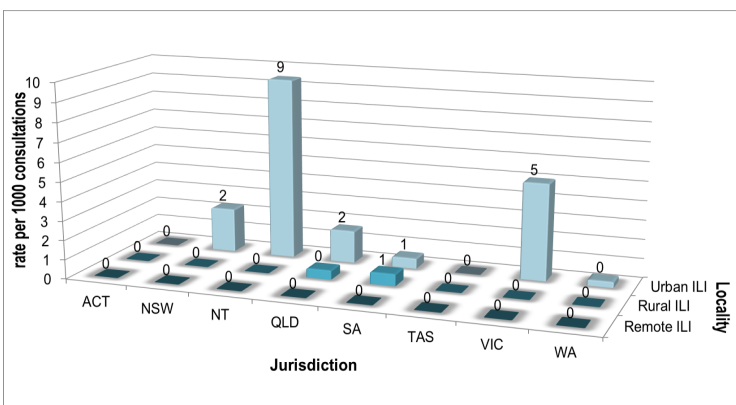

Figure 2. ASPREN rate of ILI by locality and jurisdiction, weeks 13 - 14, 2022.

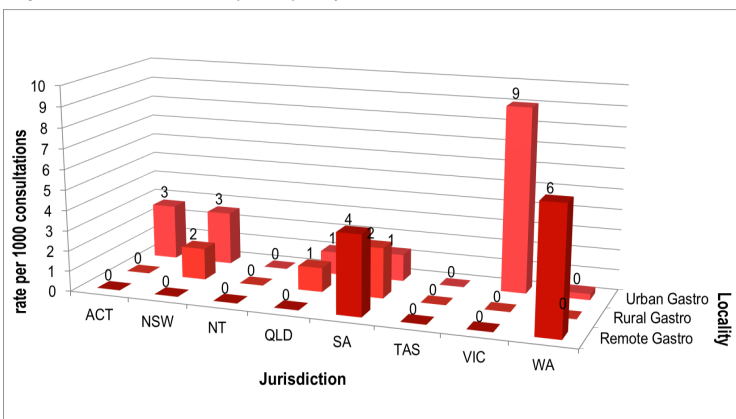

Figure 3. ASPREN rate of gastroenteritis by locality and jurisdiction, weeks 13 - 14, 2022.

NATIONAL SUMMARY

1 Influenza-like-illness levels remain steady below baseline levels

1 Case of influenza have been detected in this reporting period
1 x Influenza A
0 x Influenza B

0% Influenza positivity during the reporting period.

1 Cases of influenza have been detected this year:
1 x Influenza A
0 x Influenza B

1 Gastroenteritis levels remain steady below baseline levels

**SYNDROMIC SURVEILLANCE
REPORTING**

Reports were received from 204 reporters from 8 states and territories during the reporting period. During weeks 13 and 14 reporters saw a total of 29,872 patients.

INFLUENZA-LIKE-ILLNESS (ILI)

Nationally, ILI notifications increased during the period with 41 notifications being reported in weeks 13–14. ILI rates reported in this period were 2 cases per 1000 consultations (weighted). This was similar to the previous fortnight where rates were 1 and 3 cases per 1000 consultations in weeks 11 and 12 respectively. For the same reporting period in 2021, ILI rates were slightly lower at 2 and 1 cases per 1000 consultations for weeks 13 and 14 respectively (see Fig. 5).

GASTROENTERITIS

Nationally, gastroenteritis notifications decreased over the period with 48 notifications reported. Gastroenteritis rates reported in this period were slightly lower at 2 and 1 cases per 1000 consultations in weeks 13 and 14 respectively, compared to 3 and 2 cases per 1000 consultations in weeks 11 and 12 respectively (see Fig. 5).

* ASPREN is funded by the Commonwealth's Department of Health, Office of Health Protection, Vaccine Preventable Disease Surveillance Section.

* VicSPIN is funded by Melbourne Health and the Victorian Infectious Diseases Reference Laboratory.

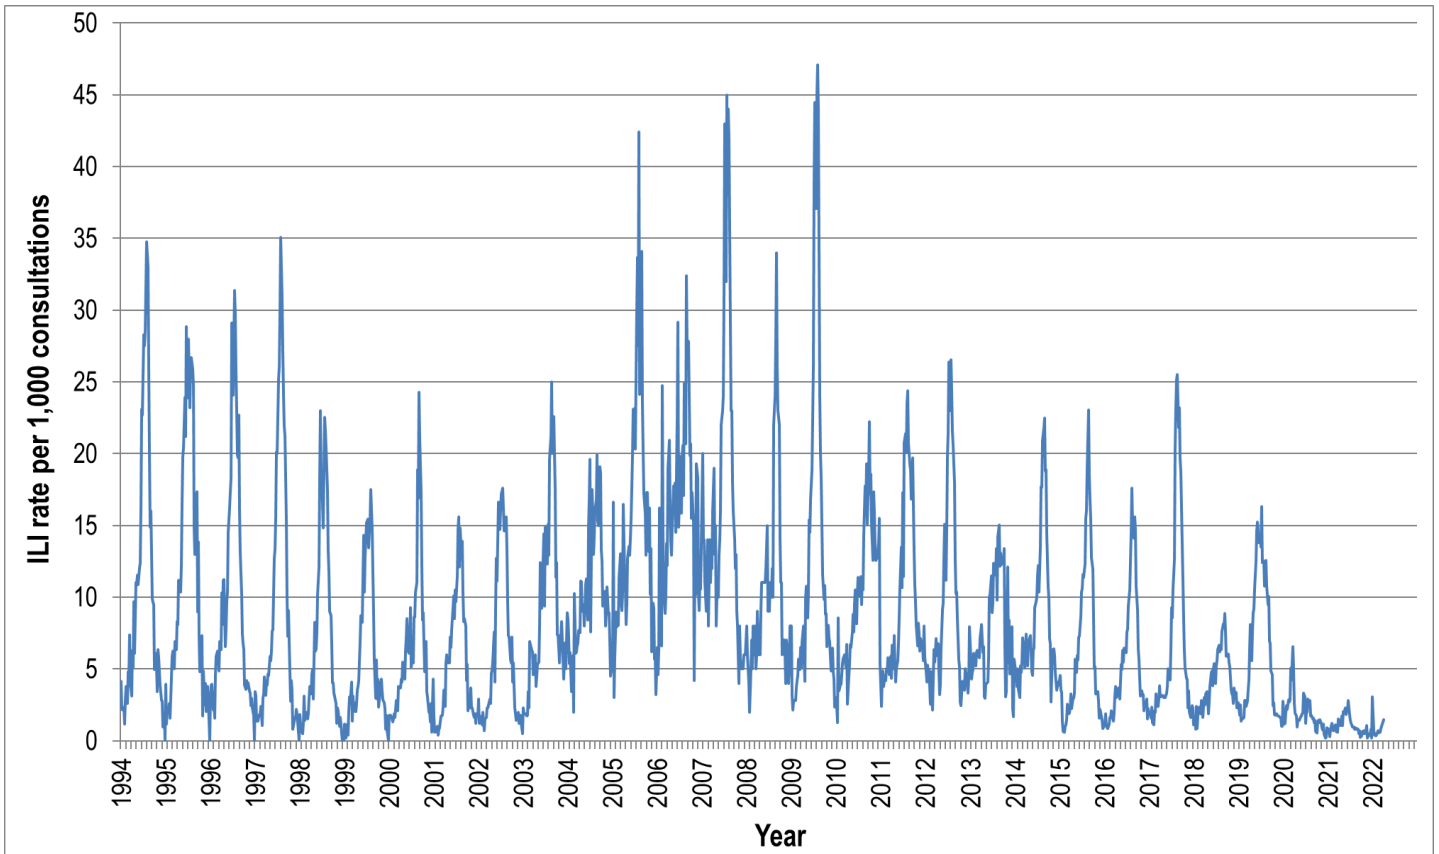

Figure 4. ASPREN ILI rates 1994 - 2022.

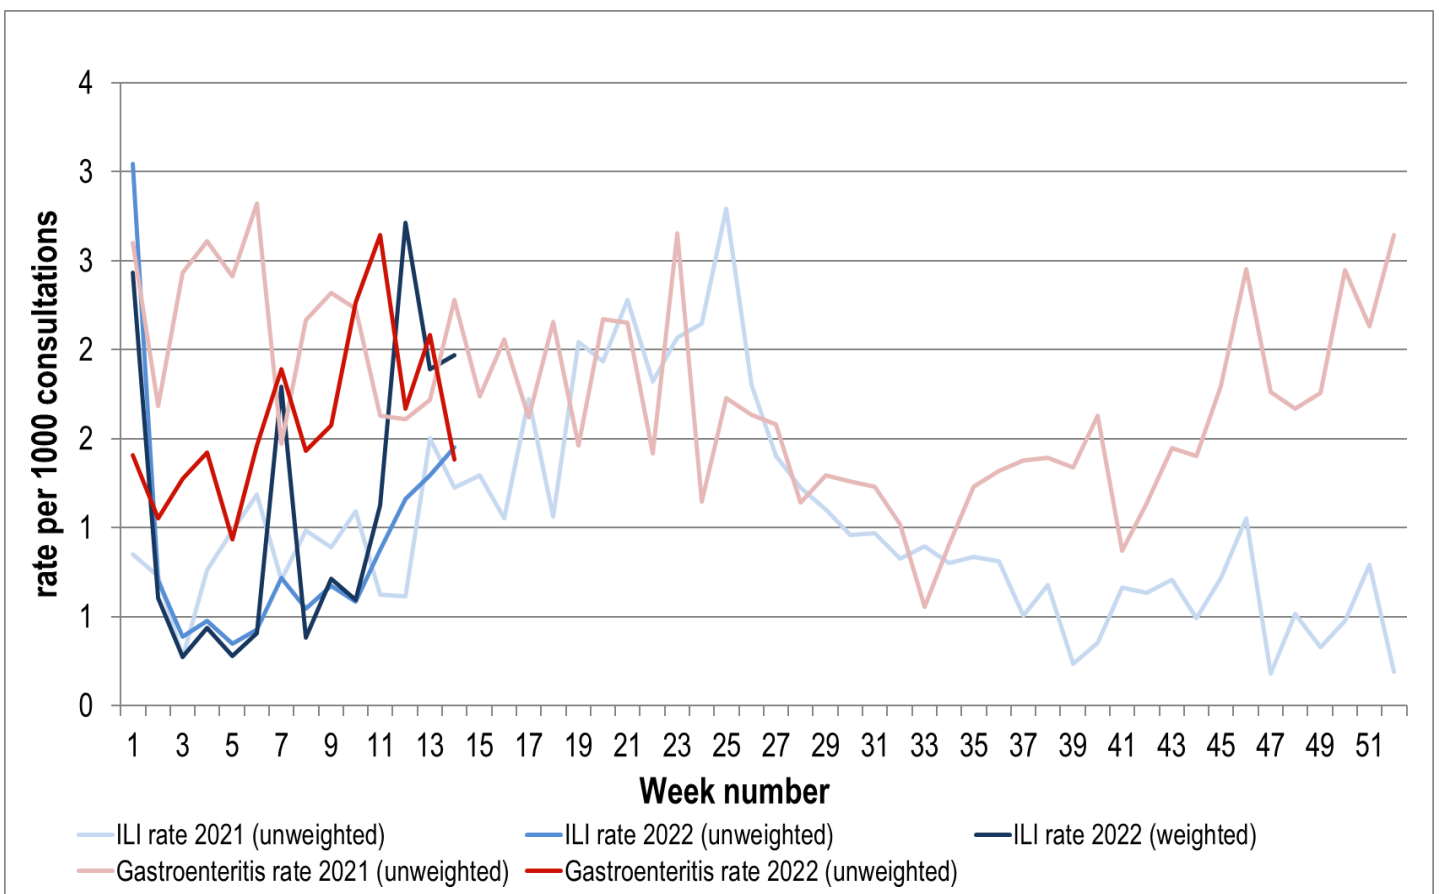

Figure 5. ASPREN + VicSPIN ILI and ASPREN gastroenteritis rates 2021-22. Weighted rates are weighted to account for population size differences between jurisdictions, using population estimates from the 2011 Australian Census.

VIROLOGICAL SURVEILLANCE

41% of all ILI patients were swab tested during weeks 13 and 14 (see Figure 6).

3 cases of SARS-CoV-2 and 1 case of Influenza A were detected during this period. There were 3 cases of Rhinovirus detected making it the equal most common respiratory virus circulating the nation at present (see figure 8).

Viral laboratory data are provided by SA Pathology and VicSPIN laboratories.

	Reporting Period 28 Mar - 10 Apr 2022	YTD 1 Jan - 10 Apr 2022
Total number of ILI notifications	41	185
Number of swab tests performed	17	63
% ILI patients tested	41%	34%
% of swab tests positive for influenza	6%	2%
